

PERMANENT COSMETICS by Donna Furr

When you get your permanent makeup done with Donna it will look natural. ***"I'm not trying to replace the going out make up"***, only to make your natural beauty enhanced and pretty for when you have nothing on. **No more runny, smudgy lack of eyeliner, brows and/or lip color!**

EYE LINER More women everyday are finding that for many reasons permanent eyeliner is perfect for them. Eyeliner can be applied in many styles and colors, from soft, natural-looking lash enhancement to a defined line--the choice is yours! Whatever look you choose, you will wake up, shower, exercise, work, swim, and go to bed always looking your best. ***Intradermal Cosmetic procedures are recommended for anyone vs. conventional makeup.***

FULL LIPS/LIP LINER Tired of re-applying your lip liner and lipstick over and over again during the day? Do the current all day lipstick brands make your lips dry or chapped? Would you like more definition, fuller lips, or to correct a crooked lip line? ***Permanent makeup does not feather into the surrounding skin.*** It adds definition and color for a healthier complexion and can minimize the appearance of wrinkles.

EYE BROWS The implantation of pigments in the lash line look is popular with both male and female clients. If desired eye shadowing of color can be added. From providing a basic guideline for you to follow should you like to pencil them yourself, Donna can create you anything from a few hair strokes to fill those holes to dramatic fully colored brows that even your closest friends won't believe aren't your own. ***Great for everyone with lasting color all day long when swimming, playing tennis or wipe their forehead without the embarrassment of losing their eyebrows.***

You will benefit from cosmetic Intradermal Permanent Cosmetics (tattooing)

- Busy people with little time to re-apply makeup.
- People with allergies to conventional makeup.
- Anyone who desires freedom and convenience from daily makeup applications.
- Those who are physically incapable of applying makeup well.
- Athletic people and those with oily skin who tend to shed makeup easily.
- Burn or cancer survivors.
- Women who wish to look their best all the time.

Frequently asked Questions

Q. Is the procedure painful?

A. Topical anesthetics are used to minimize discomfort and most often pain free process.

Q. Do I have a choice in the placement of pigments?

A. Of course. You will be fully aware during the procedure and instrumental in the look you want to achieve.

Q. What is involved in recovery?

A. There may be slight swelling or redness in the skin but, not usually. You may resume normal activities immediately after the procedure. Within 5-6 days your epidermis is healed. Complete healing takes 14-28 days while the *"pigmentation matures"* and reaches its final color.

Q. Do we sterilize?

A. Yes and I use new disposable products
